FUND	STRATEGIC INCOME Cash [†]	BALANCED DEFENSIVE Inflation [†]	CAPITAL PLUS Inflation [†]	BALANCED PLUS ASISA fund category average (excl. Coronation funds) [†]	TOP 20 FTSE/JSE C-SWIX [†]
FUND DESCRIPTION	Conservative asset allocation across the yielding asset classes. Ideal for investors looking for an intelligent alternative to cash or bank deposits over periods from 12 to 36 months.	A lower risk alternative to Capital Plus for investors requiring a growing regular income. The Fund holds fewer growth assets and more income assets than Capital Plus and has a risk budget that is in line with the typical income-and-growth portfolio.	Focused on providing a growing regular income. The Fund has a higher risk budget than the typical income-and-growth fund, making it ideal for investors in retirement seeking to draw an income from their capital over an extended period of time.	Best investment view across all asset classes. Ideal for pre-retirement savers, as it is managed in line with the investment restrictions that apply to pension funds. If you are not saving within a retirement vehicle, consider Market Plus, the unconstrained version of this mandate.	A concentrated portfolio of 15-20 shares selected from the entire JSE, compared to the average equity fund holding 40-60 shares. The Fund requires a longer investment time horizon and is an ideal building block for investors who wish to blend their equity exposure across a number of funds. Investors who prefer to own just one equity fund may consider the more broadly diversified Coronation Equity Fund.

FUND DESCRIPTION	An intelligent alternative to dollar-denominated bank deposits over periods of 12 months or longer.	A low-risk global balanced fund reflecting our best long-term global investment view moderated for investors with smaller risk budgets. We offer both hedged and houseview currency classes of this fund. In the case of the former, the Fund aims to preserve capital in the class currency over any 12-month period.	A global balanced fund reflecting our best long-term global investment view for investors seeking to evaluate outcomes in hard currency terms. Will invest in different asset classes and geographies, with a bias towards growth assets in general and equities in particular.	The aim of the Fund is to maximise long-term investment growth by investing in a range of opportunities available in public asset markets from both SA and around the world. Our intent is to provide competitive after-inflation returns measured in rand over all five-year periods.	The Fund aims to give investors access to the best opportunities in global equity markets. The Fund is biased to developed markets and actively seeks out attractively valued shares to maximise long-term growth. Our intent is to outperform the global equity benchmark over all periods of five years and longer.

It is therefore recommended that the reader first obtain the appropriate legal, tax, investment or other professional advice and formulate an appropriate investment strategy that would suit the risk profile of the reader prior to acting upon information. Neither Coronation Fund Managers Limited, Coronation Management Company (RF) (Pty) Ltd nor any other subsidiary of Coronation Fund Managers Limited (collectively "Coronation") is acting, purporting to act and nor is it authorised to act in any way as an adviser. Coronation endeavours to provide accurate and timely information but we make no representation or warranty, express or implied, with respect to the correctness, accuracy or completeness of the information and opinions. Coronation does not undertake to update, modify or amend the information on a frequent basis or to advise any person if such information subsequently becomes inaccurate. Any representation or opinion is provided for information purposes only. Unit trusts should be considered a medium- to long-term investment. The value of units may go down as well as up, and is therefore not guaranteed. Past performance is not necessarily an indication of future performance. Unit trusts are allowed to engage in scrip lending and borrowing. Performance is calculated by Coronation for a lump sum investment with income distributions reinvested. All underlying price and distribution data is sourced from Morningstar. Performance figures are quoted after the deduction of all costs (including manager fees and trading costs) incurred within the fund. Note that individual investor performance may differ as a result of the actual investment date, the date of reinvestment of distributions and dividend withholding tax, where applicable. Annualised performance figures represent the geometric average return earned by the fund over the given time period. Where foreign securities are included in a fund it may be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in the South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. The Coronation Money Market fund is not a bank deposit account. The fund has a constant price, and the total return is made up of interest received and any gain or loss made on any particular instrument, in most cases the return will merely have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. Excessive withdrawals could place the fund under liquidity pressures, in such circumstances a process of ring-fencing of redemption instructions and managed pay-outs over time may be followed. A fund of funds invests in collective investment schemes that levy their own fees and charges, which could result in a higher fee structure for this fund. A feeder fund invests in a single fund of a collective investment scheme, which levies its own charges and could result in a higher fee structure for the feeder fund. Coronation Management Company (RF) (Pty) Ltd is a Collective Investment Schemes Manager approved by the Financial Sector Conduct Authority in terms of the Collective Investment Schemes Control Act. Unit trusts are traded at ruling prices set on every day trading. Forward pricing is used. For Domestic Unit Trust Funds and Tax Free Investments, including rand-denominated Offshore Unit Trust Funds, fund valuations take place at approximately 15h00 each business day, except at month end when the valuation is performed at approximately 17h00 (JSE market close). For these Funds, instructions must reach the Management Company before 14h00 (12h00 for the Money Market Fund) to ensure same day value. For Offshore Unit Trust Funds that are denominated in a foreign currency, fund valuations take place at approximately 17h00 each business day (Irish Time) and instructions must reach the Management Company before 12h00 (SA Time) to ensure the value of the next business day. For Retirement Products, fund valuations take place at approximately 15h00 each business day, except at month end when valuation is performed at approximately 17h00 (JSE market close). For these Products, instructions must reach the Management Company before 14h00 to ensure the value of the next business day.
